

THE CHAMBERLAIN® GROUP'S LIFTMASTER® AND ELITE® BRAND HOME ACCESS PRODUCTS SHOWCASED IN THE NEXTGEN "FIRST TO THE FUTURE HOME" IN LAS VEGAS

Elmhurst, IL – January 2009 – The Chamberlain Group, the leading single source provider for secure, convenient, quality and stylish products for every access point, will be showcasing its innovative LiftMaster side-mounted garage door opener and Elite heavy-duty commercial swing gate operator in the NextGen Home Experience in Las Vegas, NV during the week of the International Builders Show, January 20 – 23, 2009. This year's NextGen demonstration project, The "First to the Future" Home, will feature the latest in digital living products and systems that contribute to an enhanced digital lifestyle.

Selected for its innovation, functionality and performance, the LiftMaster Model 3800 Residential Jackshaft Opener (RJO) has been installed in each of the three, one car garage doors within the home. This top-of-the-line unit features an ultra-quiet 24V DC motor and is mounted on the wall beside the garage door, adding depth and style while freeing up valuable storage space. The RJO 3800 model serves as an ideal, high performing access solution for applications found in more of today's garages, since many of these applications are not compatible with traditional ceiling mounted garage door openers.

The RJO 3800 models installed in the NextGen Home are also equipped with the EverCharge™ Standby Power System, an optional feature that will operate the garage door opener for up to 20 cycles in the event of a power outage. This added feature is an easy and reliable way to ensure security, safety and convenience as well as peace-of-mind during a power outage.

In addition, the entrance gate to the subdivision of homes where the NextGen Home is located is powered by the Elite CSW200UL gate operator. Ideal for large gated

communities, residential developments, commercial complexes, and private estates, this heavy-duty commercial swing gate operator features the highest quality components and is backed by years of proven dependability.

In addition, The Chamberlain Group offers an exceptional line of LiftMaster wireless access and communication control devices that work together reliably with crisp, digital clarity, ranging from gate access panels for multiple installations to self-contained keypads for a single gate or door entry. These products offer a diverse array of wireless access solutions which can span from a main entry unit to remote access points, such as card readers, keypads, radio receivers and hand-held transmitters. The wireless access control products and accessories use both 900 MHz and 315 MHz Security+™ frequencies and are compatible with all LiftMaster intercoms and telephone interface units, all with the simple push of a button.

The Chamberlain Group, Inc. manufactures and markets access control products including residential garage door openers, commercial door operators, residential and commercial gate operators, telephone entry systems and related access control products.
