Work Shelf Undermount Sinks

2009

**GOURMET**<sup>™</sup>  
Work Shelf

Our most popular Gourmet undermount sink designs are now offered in models with a work shelf. The new Smart Support System<sup>™</sup> allows for a work shelf to rest approximately 4" below the top of the sink without compromising bowl geometry. The attractive grid pattern work shelf will support 25 pounds at any single point of the shelf.

#### Work Shelf Features and Benefits

- Made from durable type 304 stainless steel with a bright finish
- Attractive grid pattern designed for strength – unique to Work Shelf
- Supports 25 pounds at any single point on the shelf
- Positioned approximately 4" below the top of the sink – comfort height, no bending, allowing pots to be filled without splashing
- Smooth and finished sides – easy to clean, no tight ledge corners to harbor dirt and crud
- Work Shelf does not rest on the bowl bottom – you can still soak cooking utensils in the sink while using the shelf; scraps can fall through the Work Shelf onto the bottom to be disposed of at a later time
- Smart Support System does not reduce bowl capacity – what fits at the top of the compartment will fit in the bottom
- Supports are added to the sink after the finishing process so the entire sink finish has the same look and feel

Discover the professional's choice.<sup>™</sup>

**ELUHWS3120L (shown)** \$1,100.00

 Drain: LK99 \$100.00

**Sink Features and Benefits**

- 18 gauge type 304 stainless steel
- Lustrous Satin finish — attractive, dependable, and durable
- Sound Guard® undercoating — reduces noise created from a disposer or pots and pans
- Tight radius bowl geometry — maximum functionality, which is important as the current trend continues for smaller and more functional kitchens
- Double and single bowl models available
- 10" deep bowl depth offered on four models
- Limited Lifetime Warranty
