

ELKAY[®]

sinks + faucets

Introducing

Gourmet[™] Aqua Divide[™]

The small feature with the big function.

2009

GOURMET[™]
Aqua Divide[™]

The new Aqua Divide design from Elkay offers the flexibility of both a double bowl and a large single bowl in one high performance stainless steel sink. The Aqua Divide utilizes unique tooling to form the lowered partition which enables pot and pan handles or oversize items to extend over it allowing the benefits of a large single sink. Or, if you prefer, it can be used as a traditional double bowl for separated washing and rinsing. Is it a double bowl sink or a large single bowl sink? The choice is yours.

Features and Benefits

- 18 or 19 gauge type 304 stainless steel – dependable and long lasting
- 4" or 4⁷/₈" Aqua Divide for a fully functional kitchen sink
- Separates the sink into three work zones – traditional double bowl for washing and rinsing, plus the area above the partition to soak and wash oversized cookie sheets
- Clearance between the Aqua Divide partition and the faucet is maximized allowing oversized pots to be filled conveniently and easily
- The lower height of the Aqua Divide allows pan handles to extend over it for easier cleaning and allows you to easily move heavy pots and pans from one compartment to the other
- Sound Guard[®] insulation package – keeps unwanted noise to a minimum
