SUBLIME DESIGN

The Mystic®, a new innovative sink from ElKay®, is where beautiful form meets inspired function.

IN SYNC STYLE

For more than 88 years, ElKay has been a pioneering manufacturer of stainless steel sinks. Recently, it combined the imagination of its customers, the inspiration of its designers, and the creativity of its product development team to create a new addition to the Mystic sink family. While maintaining the signature Mystic elements—like contemporary appearance, naturally flowing contours, and an organic feel—this new sink also incorporates design facets like an oversize rectangular shape and a gentle wave in one corner, which provides the perfect place for an ElKay contemporary faucet.

TOP-SHELF DETAILS

The new single-bowl ElKay Mystic sink features a truly inventive design with a removable, heavy-duty stainless shelf. It is suspended on three sides by a unique bi-level bowl created to receive the shelf without clips or stanchions.

The Mystic's original design allows the user to enjoy the attractive, large single-bowl capacity, while the removable shelf enhances the sink's functionality by providing an added work surface. The shelf itself features a pattern of repeating circles, adding to the overall contemporary geometric aesthetic.

SOUND STRUCTURE

The ElKay Mystic is made from thick, durable 16-gauge steel and comes with an 8-inch deep bowl, which is an ergonomically friendly depth for a primary kitchen sink. The offset drain sink includes a stainless work grid with a satin finish that will maintain its lustrous appearance for years to come. In addition, all ElKay sinks feature a fully undercoated bottom for superior sound-dampening capabilities.
