InSinkErator® Introduces New Instant Hot Water Dispensers

InSinkErator®, the world's largest manufacturer of food waste disposers and instant hot water dispensers, announces the availability of its new line of instant hot water dispensers, the Series 2200. Coinciding with recent kitchen design trends, the new product line consists of two traditional high-end faucet models, Country (shown above) and Victorian.

Both designs are available in hot/cool and hot-only water models. The two faucet styles, are available in 12 designer finishes, including satin nickel and oil rubbed bronze. The Series 2200 also comes standard with the F-201 filtration system, which reduces chlorine taste and odor.

Gerber Introduces The Logan Square™ Series

Gerber unveils a new, complete line of bathroom faucets and fittings -- the Logan Square™ Series. An integral extension of its latest Logan Square Suite collection, this transitional series includes lavatory faucets, Roman tub fillers, and tub and shower fittings.

Available in chrome and brushed nickel finishes, the Logan Square Series is suited for any bath or powder room, featuring graceful arcs in simple, yet elegant designs. Complementing the style of the vitreous china offered in the bathroom suite, this faucet line is equipped with highly-functional ceramic disc cartridges and all brass waterways.

Alsons Expands Award-Winning IN2ITION® Lineup

Alsons® Corporation recently introduced new designs for its IN2ITION® hand shower/shower head shower system. The ergonomically designed IN2ITION delivers an enhanced level of comfort, convenience and versatility by combining a hand-held shower with four or five spray settings, and a fixed shower head with an extra wide spray. The patented four-spray IN2ITION was the recipient of Design Journal Magazine's 2007 Platinum ADEX Award.

"Enhancing the shower experience continues to be a dominant trend with homeowners. The IN2ITION is all about versatility and convenience users have the option to remove the hand-held from the fixed shower head, or they can use them both at one time for the maximum shower experience. This combination is perfect for consumers who enjoy long, relaxing showers to unwind from a stressful day," said John Davies, vice president of sales and marketing, Alsons Corporation. "The IN2ITION also represents the ultimate shower makeover and is perfect for users who want to upgrade their older shower heads with an innovative, stylish system."

Bemis Introduces the XCITE! Hinge

Using a patented process, Bemis has designed the XCITE!™ hinge to combine sleek aesthetics with cleanability. There has never been a toilet seat hinge of its kind on the market.

Instead of the usual two hinges attaching the seat to the bowl, XCITE! has a single, continuous hinge base. The longer, wider mount enhances the seat's stability. It's incredibly easy to install and in lieu of mechanical hardware to connect the hinge to the cover and ring, Bemis uses biscuit joinery technology that results in an exceptionally secure fit.

Artisan Introduces Two Steel Farmhouse Sinks

Artisan Manufacturing has introduced their two new premium stainless steel Farmhouse Sinks. The Traditional apron design offers 10" of depth with an elegantly tapered, arched front panel. For those installations where the Farmhouse Sink interior styling and volume are important, Artisan offers an undermount model.

This new Farmhouse Collection offers a remarkable 16 gauge thickness, 304 commercial grade in 18/10 stainless steel. The superior craftsmanship provides long-lasting beauty, while offering resistance to both stains and corrosion. All under surfaces are covered with V-Therm Shield™ providing superior sound deadening and thermal retention.
