GATE OPERATORS

RADIO CONTROLS

TELEPHONE ENTRY

AND ACCESS CONTROLS

Thinking Beyond Your Perimeter

Gated communities. Private residences. Businesses of all sizes. At every entrance and every point of access, we provide the products that meet your specifications, with the style, convenience and safety your customers demand – all from one source.

Radio-Controlled Access Products

All Chamberlain Professional Products are designed to work together seamlessly. With the simplicity of one remote control and the reassurance of patented Security+® technology.

One control controls them all. Now owners and property managers can have access to all entrances from their car or with a convenient keychain remote. Universal receivers like the STAR™ 450 are easily programmable and expandable for up to 450 users. Passport™ controls can even include a proximity sensor for access through reader-controlled areas.

or call 800.282.6225.

ELITE™

LiftMaster®

Gate Operators

Simply the best name in the industry with a reputation for quality, dependability and award-winning designs to complement any gated entrance. We offer a complete line of gate operators designed to meet or exceed UL325 safety standards. As an added benefit, all Elite™ and LiftMaster® gate operators come standard with a built-in 315MHz radio receiver for convenient remote control access!

Residential

Designed for single-family homes and normal traffic applications, our slide and swing gate operators offer the choice of AC or DC powered models with battery run and solar panel options.

Commercial

Our line of commercial swing, slide and barrier gate operators continues to be the industry's benchmark for reliability, safety and security. Special features such as synchronized operation of barrier gate operators with slide or swing gates provide the highest level of security, anti-tailgating functionality and smooth traffic control.

Industrial

Heavy-duty slide, swing and barrier gate operators designed for applications requiring continuous operation, high security and gate applications weighing up to 5,000 lbs.

Telephone Entry and Access Controls

We put control in the hands of residents and property managers with the most advanced, vandal-resistant offering of telephone entry systems, access controls, keypads, card readers and handheld access devices.

The EL2000 telephone entry system may be the most versatile telephone entry/access control system ever created. Designed for multi-tenant communities or commercial buildings, it is fully expandable and adaptable to manage multiple access points/devices as the application demands or as your needs evolve.
