**CHAMBERLAIN® INTRODUCES
LIFTMASTER® FINGERPRINT KEYLESS ENTRY
*A New Access System As Unique As a Fingerprint***

Elmhurst, IL – February 2008 – The Chamberlain Group, Inc., the single source provider for secure, convenient, quality and stylish products for every access point, introduces the LiftMaster Fingerprint Keyless Entry (Model 379LM). At the forefront of security and technology, the LiftMaster Fingerprint Keyless Entry provides keyless, codeless home access, coupled with reliable functionality and easy programmability; ensuring homeowners have simple and secure access to their home or property with one touch of their finger.

With a growing number of homeowners now relying on the garage door instead of the front door for access into the home, the new LiftMaster Fingerprint Keyless Entry makes this home access even more effortless -- no lost keys, nothing extra to carry, and now not even a code to remember.

The Fingerprint Keyless Entry can read up to four unique fingerprints to instantly open a garage door or gate. As an added bonus to the homeowner, this new system is codeless, eliminating the need to memorize a code and preventing it from being shared with unwanted guests, making access to the garage quick, safe, and secure.

"By simply swiping a finger over the sensor, the garage door opener will operate, literally letting homeowners go keyless and providing them with complete control over who has access to their home," said Dan Nixa, director of marketing, Chamberlain Professional Products.

LIFTMASTER FINGERPRINT KEYLESS ENTRY – PAGE TWO

“This proprietary technology is only available through authorized LiftMaster dealers, guaranteeing that homeowners are receiving high quality installation, customer service and education on how the LiftMaster Fingerprint Keyless Entry system can benefit their individual needs," added Nixa.

Backed by a one-year warranty, the Fingerprint Keyless Entry is compatible with all LiftMaster 315MHz residential garage door openers and commercial operators and all 315MHz LiftMaster and Elite® gate operators, providing the homeowner with a fully integrated access system.

The wireless Fingerprint Keyless Entry features a weatherproof slide up cover. Also, the unit comes with four AAA batteries and is designed to shut off after 10-seconds of inactivity to prolong and preserve battery life.

Installation for the Fingerprint Keyless Entry is quick and easy, and the unit can be easily programmed to the garage door opener or gate operator. Enrolling user fingerprints is also simple and can be done in four easy steps. For added peace-of-mind, the unit is equipped with LiftMaster Security+® rolling code technology.

For inquiries on the LiftMaster Fingerprint Keyless Entry system or to find an authorized LiftMaster dealer near you, please contact 800.528.6563 or visit www.liftmaster.com.

The Chamberlain Group, Inc. manufactures and markets access control products including residential garage door openers, commercial door operators, residential and commercial gate operators, telephone entry systems and related access control products.
