

The ADVOCATE

Sachs Plumbing Supplies puts customers first

Since 1940, Sachs Plumbing Supplies has been a true do-it-yourself plumbing store that serves the needs of homeowners and contractors. Even as it has grown over the years, the family-owned business has remained true to its mission to make customer service a top priority. Long-time customers know that the friendly, expert counter-men can identify items that are 80 years and even older and find replacement parts for them. They will not push you to buy a new item unless you want to - you should only buy what you really need.

In addition to the extensive parts department, Sachs has a stunning showroom for people who are interested in upgrading

or remodeling their kitchen and/or bathrooms. Sachs sells products from high quality manufacturers such as American Standard, Porcher, Toto, Grohe and Elkay, including sinks, faucets, countertops, lighting, toilets, shower enclosures, showerheads, vanity cabinets, bathtubs, whirlpools, mirrors, medicine cabinets, towel bars and warmers, steam generators and exhaust fans. The staff will take the time to help you, whether you are just looking for a new faucet or you are planning a whole new bathroom.

Small changes can make a big difference in your kitchen or bathroom. A new, deep sink and gooseneck faucet with pull-out hose will make food preparation and clean-up easier. A water filter

or filter for your icemaker will make your tap water taste better. Designer shower heads save water and can provide a brand new showering experience. New toilet seats that softly self-close without slamming and decorative tank levers are nice additions to your bathroom. Towel warmers are a wonderful and inexpensive luxury, especially during the cold weather.

At Sachs, the unofficial motto is "We get it right the first time." Come to Sachs first. Check their newly redesigned website for new specials items that can save you even more money.
